## Prevent – Collective Fall Prevention

# Components of a Personal Fall Protection System

## Anchorage

Anchorage are a secure point of attachment.

Anchorage connectors vary by industry, job, type of installation and structure. They must be able to hold fast under the load of a fall, working in suspension or a rescue.

**A**

+

## Body support

Harnesses distribute fall forces over the upper thighs, pelvis, chest and shoulders.

They provide a connection point on the worker for the personal fall protection system.

**B**

+

## Connecting devices

Products such as shock absorbing lanyards or self-retracting lifelines connect a worker's harness to the anchorage.

**C**

## Descent and rescue

Descent and rescue devices are used to retrieve an injured worker retrieve them from a confined space.

**D**

+

## Education

We offer a variety of training and consultative services to fit your needs.

**E**

+

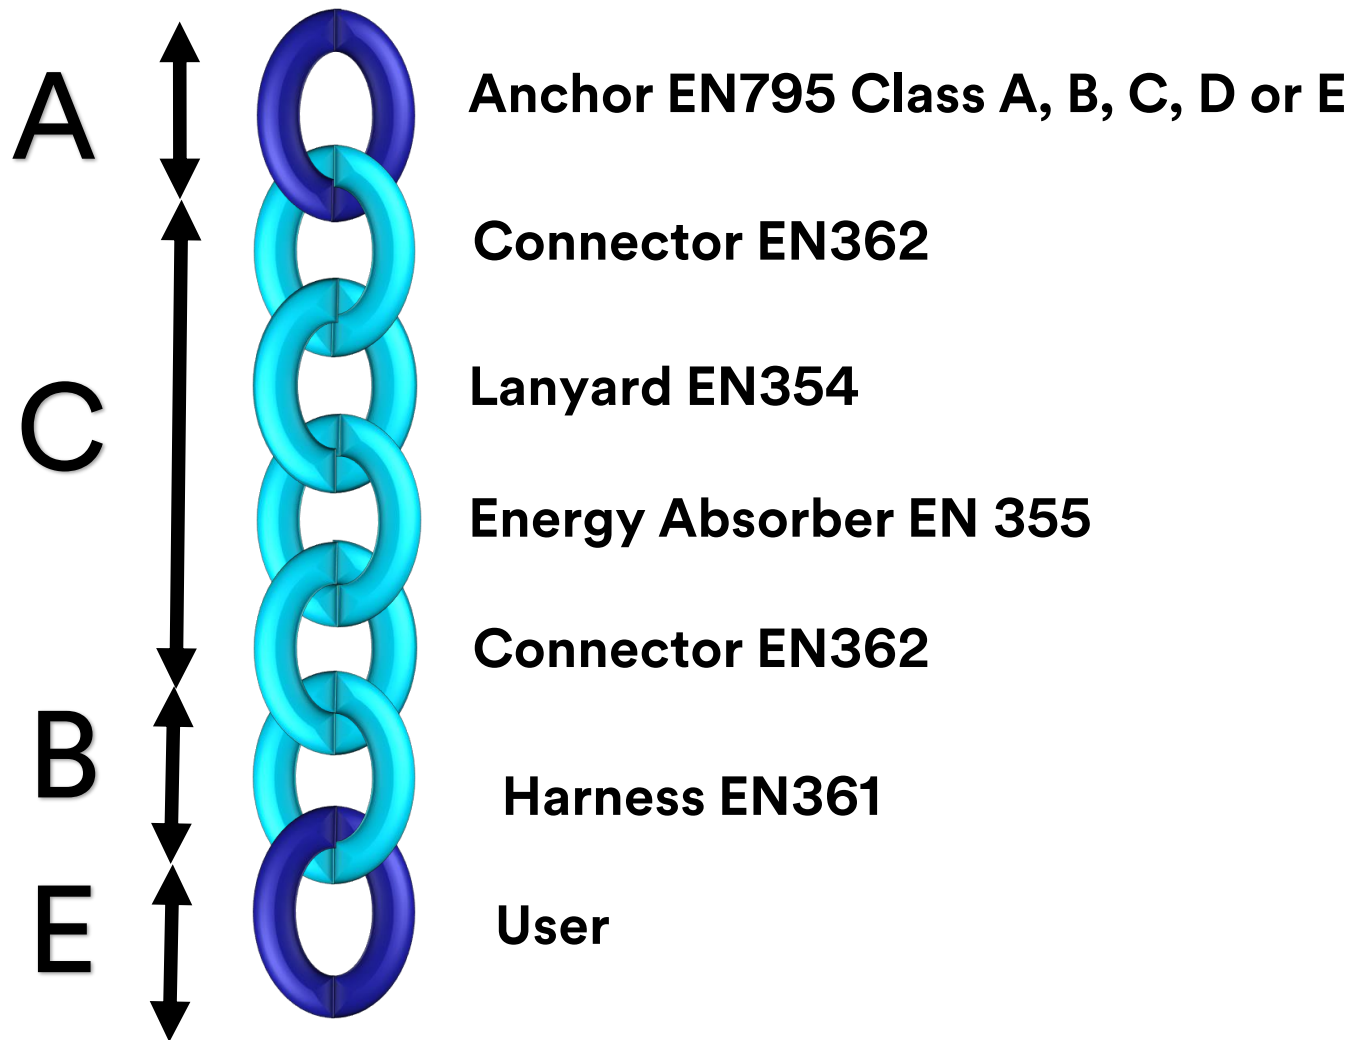

## Fall protection for tools

Helps make work environments safer and more productive by reducing dropped object incidents.

**F**

# C – Connecting Devices

## Standard Aluminum Scaffold Hook

Catastrophic Failure of Standard Hook if Crossloaded

# 3M Comfort Grip Connector

Comfort Grip Designed for Ease of Use and Safety – Side Load Certified

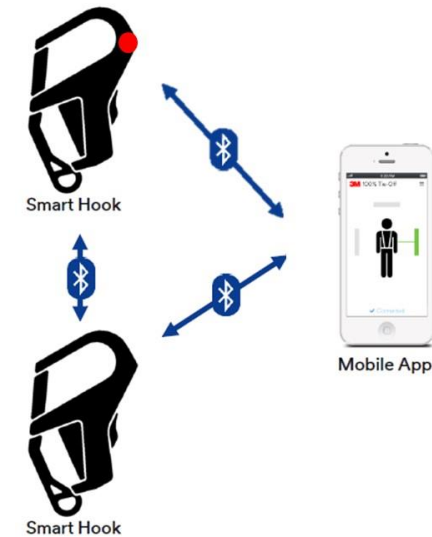

# Implementation

## Product Usage

- Real Time Worker Notification
- Visual Alert

## With Mobile APP

- Real Time Worker Notification
- Visual + Optional Audio Alert
- Data Collection and Individual Summary

Personal Fall Protection Equipment

Engineered Horizontal and vertical systems

Fall Protection, Confined Space and General Safety Training

Confined space access equipment

Product support and promotion

Support & Consultation Services

Equipment and installation inspection services
